Customers who have concluded an update contract for their version of map&guide automatically receive the latest map&guide version (program and map update). At least one update will be received annually. An update contract can be concluded up to two months after purchasing map&guide.

Payment is made one year in advance starting on contract conclusion. The contractual relationship begins on the first day of the month following the month in which the software was delivered. Payment is based on the maps implemented.

The update contract is valid from the day of its conclusion for an indefinite period of time, but for a minimum of two calendar years. The contract can be terminated with three months notice from the end of the year.

We would be delighted to send you an update contract. Just contact our sales department.

E-mail: request@mapandguide.com

Tel. +49 (0)721 / 9651 -8199

**Update fee**

The update fee per calendar year is 25% of the normal licence price.

☐ Please send me an update contract.

**Why is an update contract worthwhile?**

After signing an update contract you will automatically be sent the current program version updates and map updates. The update contract is also much cheaper than a single update.

Example:

Assume you are using map&guide professional version 2008 with the DACH City map:

- Update without contract agreement:
  **€ 479**
  (one update delivery)
- 2-year update contract:
  **€ 399.50**
  = € 799 x 25% x 2 years
  (two update deliveries)

This is a saving of € 79.50.
